

RED HILL HAS PICKED UP ORE BEYOND FAULT

Discovery Made in Territory Not
Held Under Lease By the
Silver-Pick Co.

Ore having a good content of gold, silver and copper, in some places assaying high in the last, has been opened on the 700-foot level of the Red Hill, not in territory leased from the Florence, but in the Red Hill company's own ground. This ore is in general not of shipping grade, but the fact that it is south of the east-west fault in the Florence gives importance to it. But comparatively little work has been done in the ore body and it will require at least two weeks for completion of the development plans as outlined.

This find follows the starting of work some time ago on the 700-foot level. A drift was driven south through the east-west fault and at 190 feet from the shaft the first vein was found. This vein has been drilled in since it was entered, but no crosscutting has been done, and now it has been in ore for twenty feet. A raise has been driven fifteen feet in good ore. A chute in this raise was completed last Friday and on Saturday drilling was resumed, with all the holes in good hard quartz. Crosscuts are to be started east and west in a few days, and the raise and the south drift are to be continued. There has been some delay recently because of bad ground, but this difficulty has been ended. Two shifts of miners have been employed since the find was made, but for the last few days all of the work has been done on the day shift. The use of a second shift was resumed Tuesday.

The vein is nearly vertical, in this respect being like the Little Florence. All of the work done thus far has been in quartz and possibly the sliced area is very wide. It is difficult to determine at present what the find will amount to, as it is not known whether the drift is in the best or least favorable part of the vein. However, regardless of what the work eventually will reveal, it has been determined that there are real ore bodies south of the fault, and this in itself is of great importance to the Red Hill company. Some ore was found south of the fault on the 500-foot level, but only in bunches. The question always has been whether this ore was formed before or after the faulting and the many fault drags have indicated that it was deposited before the faulting. The new development in the Red Hill seems to prove this to be true, and if it is true there is no reason why ore bodies as great as those north of the fault cannot be found to the south.

LAFAYETTE DAY IS TO BE OBSERVED

In a proclamation issued by Governor Emmett D. Boyle, Wednesday, Sept. 6, has been named Marquis de Lafayette in commemoration of the one hundred and sixty-fifth anniversary of the death of that distinguished Frenchman and the eighth anniversary of the first battle of the Marne. The proclamation follows:

"Whereas, Sept. 6 is at once the one hundred and sixty-fifth anniversary of the birthday of the Marquis de Lafayette and the eighth anniversary of the first battle of the Marne; and
"Whereas, the day has been heretofore celebrated by patriotic citizens of the United States of America and France as a fitting occasion on which to acknowledge the ties which have for nearly a century and a half bound the two republics together;
"Now, therefore, I, Emmett D. Boyle, governor of the state of Nevada, by the authority in me vested, following the precedent established by illustrious Americans in 1915, do proclaim the foregoing and call on the people of Nevada to observe Sept. 6, 1922.

RENO ROUNDUP DRAWS CROWD IN ADVANCE

Forth Annual Entertainment Is
To Begin Saturday and
Last Over a Week

RENO, Nev., Aug. 30.—Reno is all anticipation. Saturday brings the Nevada roundup and the town is already beginning to swarm with visitors. By far the biggest attendance ever enjoyed by an Nevada celebration is what the committee is sanguine prophesying for the affair. This conclusion is based upon the early influx of visitors and upon the flood of inquiries from out-of-town points.

The housing problem for the visitors is being more systematically cared for this year than ever before. The American legion and the Y. M. C. A. have joined forces in canvassing the town and ample provision is promised for the visiting public. The endeavors in this direction are materially helped by the big building program which Reno has completed for this season. Over 200 new homes, built this year, are helping furnish spare rooms.

For over a week cowboys from all over the west have been making Reno their Mecca. A large delegation from Elko and other eastern Nevada points were among the first to arrive. W. L. Sims, with the biggest string of bucking and trick horses that ever came to a Reno rodeo, rode in from Malin, Ore., a week and a half ago and has been acclimating himself and his stable to the track. Another of the early arrivals was Ben Doherty, who won the bucking contest first day last year.

As Lafayette-Marne day, with appropriate celebration in public places and in their homes, that this historic day and its meaning to America and her sister republic be not forgotten.
